

# Form Release

## FARM FRESH

Using the latest micro-emulsion technology, FARM FRESH is an innovative, 100% natural organic chemical release agent. Ideal for sensitive environmental situations such as bridge formwork over rivers and streams or potable water reservoirs. FARM FRESH provides quick, easy release and leaves an architectural bondable concrete surface. 100% guaranteed satisfaction.

### USAGE:

Chemically releases concrete from plywood, steel, aluminum, polystyrene and fiberglass forms and form liners. Prevents concrete buildup on all equipment. Cleans and reconditions forms. Helps eliminate buildup, bug holes and fines.

### SURFACE PREPARATION:

Forms and equipment should be free from dirt, hardened concrete and foreign matter.

### APPLICATION:

STIR BEFORE USE. Apply in thin film for maximum protection and economy. Spread uniformly with cross spray to avoid pin holes and uncoated areas. Puddles should be wiped up with squeegee or rag prior to use of forms. Prior to coating plywood forms, apply one or two heavy brush coats to edges for waterproofing protection.

### PACKAGING:

5 gal./18.9 L pails  
55 gal./208 L drums

## FORM RELEASE SILVER

A lighter-bodied, economical chemical release agent for steel, aluminum, plastic, plywood and composition forms that leaves an unstained architectural concrete surface.

### FEATURES/BENEFITS:

- Economical – low cost per gallon
- Does not impair bonding of paint and surface coatings
- Non-staining on grey concrete
- Extends life of wooden forms, eliminates expensive form cleaning
- Maintenance costs and cleanup time are reduced by as much as 50%
- Does not require red label
- Won't freeze

### SURFACE PREPARATION:

Forms and equipment should be free from dirt, hardened concrete and foreign matter.

### APPLICATION:

Spray direct from container in all working temperatures. Apply in thin film by sprayer for maximum protection and economy. Spread uniformly with cross spray to avoid pin holes and uncoated areas. Puddles should be wiped up with squeegee or rag prior to use of forms. Prior to coating plywood forms, apply one or two heavy brush coats to edges for waterproofing.

### PACKAGING:

5 gal./18.9 L pails  
55 gal./208 L drums

# Form Release

## CWC STRIP - EEZ

Release agent scientifically prepared formula of STRIP-EEZ with BUTYL-T creates a very thin, tough film with uniform good bond-breaking characteristics. There are no weak spots in the film to allow a gradual build-up of concrete residue on forms. Years of on-the-job usage under all conditions proves that forms strip easily, have a longer life, and stay

Scientifically blended and ready for use. STRIP-EEZ is carefully blended under laboratory controlled conditions using highly refined and pure mineral spirits as a carrier for the exclusive BUTYL-T and other form-release ingredients. Properly sealed in the most modern container available, STRIP-EEZ comes to the job uncontaminated and ready to use without dilution, stirring, or agitation. Will not freeze.

No dusting or softening of concrete. STRIP-EEZ is chemically inert to concrete or plywood, and positively will not act as a retardant to the setting or hardening of concrete. Surface durability and hardness of concrete are not impacted. STRIP-EEZ is a barrier-type release agent. The product will not gum up on forms and is not messy to handle.

STRIP-EEZ is also a product which can be applied to wet forms and will displace any present moisture. STRIP-EEZ extends plywood life, and will not wash off or leak out of forms after application. The product also contains a rust-inhibitor when used on a regular basis with metal forms.

### PACKAGING:

5 gal./18.9 L pails  
55 gal./208 L drums

### SPECIFICATIONS:

STRIP-EEZ conforms to C of E specifications CE-1401.01, CE-204, and CE-204.01.
